

Your Reliable Turf Maintenance Partner

REPLACEMENT BEDKNIVES

Oceanturf bedknives are manufactured from high quality Japanese steel.

Our factory produce bedknives in both high carbon steel and alloy steel, to suit customers' budget and requirement for durability.

FEATURES:

High Carbon Steel

- ◆ increase edge retention
- ◆ improves tensile strength
- ◆ improves resistance to wear and abrasion

Alloy Steel

- ◆ Same as high carbon steel but with additional chemical composition of chromium and vanadium
- ◆ Chromium : for increased tensile strength, toughness and resistance to wear and corrosion
- ◆ Vanadium : for increased strength and resistance to shock impact

REPLACEMENT BLADES

STANDARD PRODUCTION

Manufactured to fit major brands

CUSTOMISED PRODUCTION

Manufactured to customers' specification and/or drawings

MATERIAL AVAILABILITY

High carbon steel
Alloy Steel
Special Steel

HEAT TREATMENT

Oceanturf blades are hardened in our factory's in-house heat treatment facility to ensure uniformity in heat treatment and in compliance to the required HRC hardness for different types of blades

REPLACEMENT ROLLERS

FEATURES:

- ◆ Simple and low maintenance design
- ◆ Solid steel shaft
